

Solving the Growing Physician Shortage

The decline in access to healthcare is a critical problem in the U.S. Among the top reasons is an increasing shortage of physicians.

Consider these astonishing facts:

By 2034, the U.S. will have an estimated shortage of...

124,000 physicians (AAMC)

13,400 Cardiology, Oncology, Infectious Disease and Pulmonology physicians (AAMC)

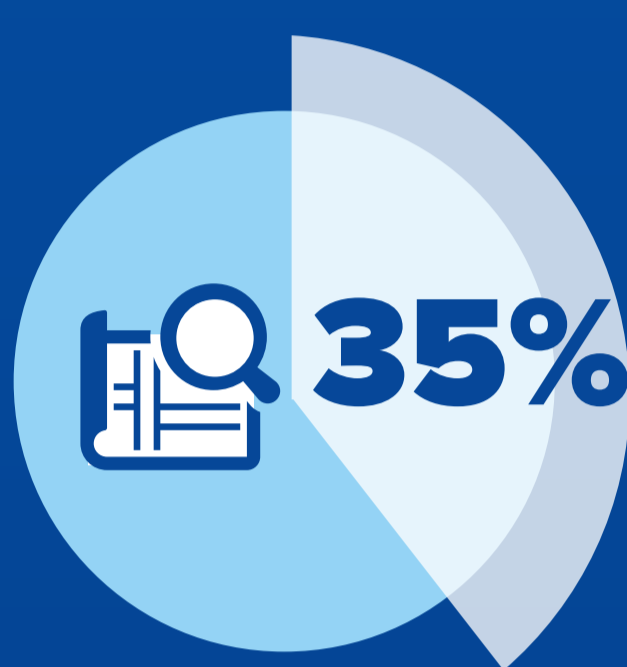

35,600 Anesthesiology, Neurology, Emergency Medicine and Addiction Medicine physicians (AAMC)

In the next decade...

2 in 5

active physicians in the U.S. will be 65 or older

of people report having trouble finding a doctor in the past two years,

of practicing physicians feel burned out at least once a week.

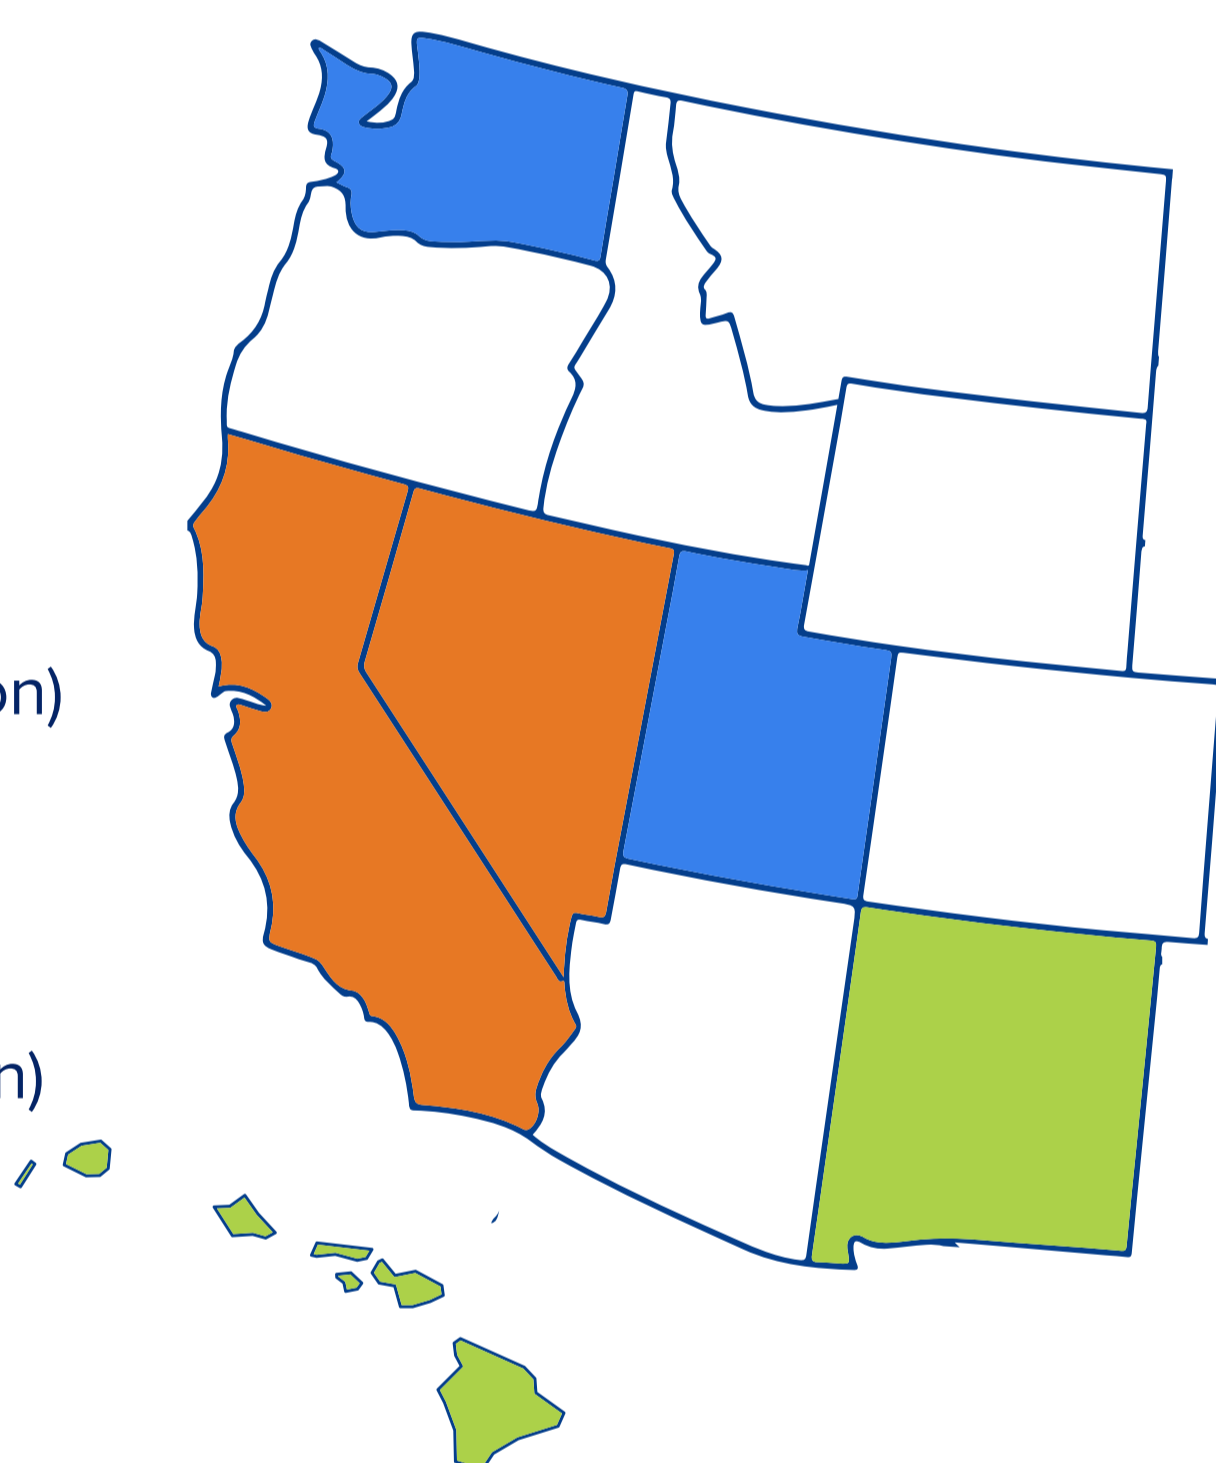

... and if barriers to patient access (including access to insurance and care in rural communities) were removed, we would immediately need...

180,400 more physicians

States with the most severe physician shortage?

- **Nevada** (20.70 practitioners per 1,000 population)
- **California** (21.2 practitioners per 1,000 population)
- **Washington** (21.93 practitioners per 1,000 population)
- **Utah** (22.09 practitioners per 1,000 population)
- **Hawaii** (22.29 practitioners per 1,000 population)
- **New Mexico** (22.4 practitioners per 1,000 population)
